

SoSoValue Buildathon · May 2026

StrategyOS

Figma for Trading Strategies. On-Chain Execution.

No-code AI strategy builder · Marketplace · On-chain logs

THE PROBLEM

Retail traders can't build institutional-grade strategies.

● No Code Access

Building trading bots requires deep engineering skills — inaccessible to 99% of traders.

● Siloed AI Models

Sentiment & prediction models exist but can't be composed into a single strategy.

● No Composability

There's no way to chain multiple AIs together into one automated workflow.

● Can't Monetize

Strategy creators have no way to earn when others use their approach.

Market Impact

10M+

active retail traders globally

\$50B+

annual DeFi trading volume

80%

trade on emotion, not data

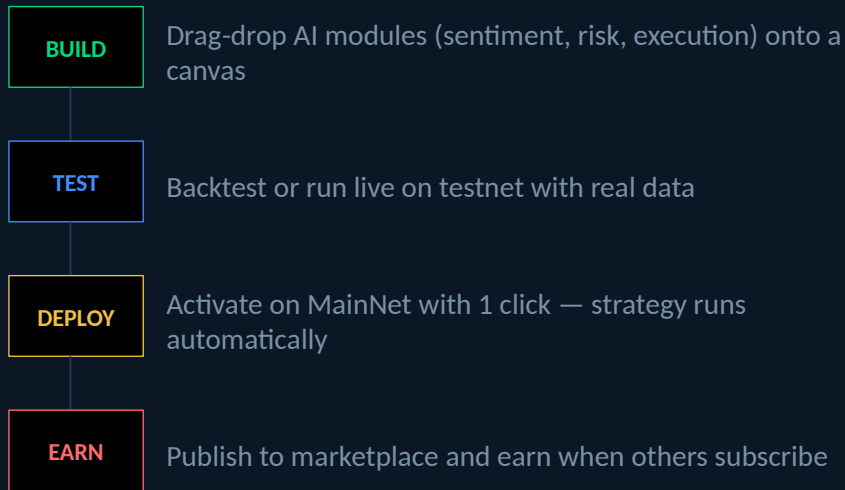

\$0

earned by most strategy creators

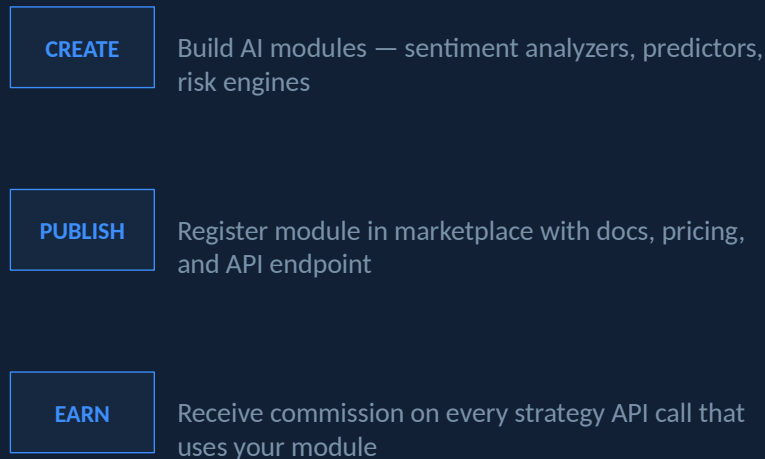

THE SOLUTION

No-Code Marketplace for AI Trading Strategies

FOR TRADERS

FOR DEVELOPERS

Platform: 15% strategy fee • 20% module API fee

From Strategy to Execution in 4 Steps

1

Builder

Drag-drop modules
(Sentiment → Risk →
Executor) on canvas. Set
parameters per module.

2

Deploy

Smart contract stores config
on-chain. TX hash on
Arbitrum — immutable
proof.

3

Execute

Every 5 min: fetch data →
run AI → risk check → place
trade on SoDEX → log result.

4

Monitor

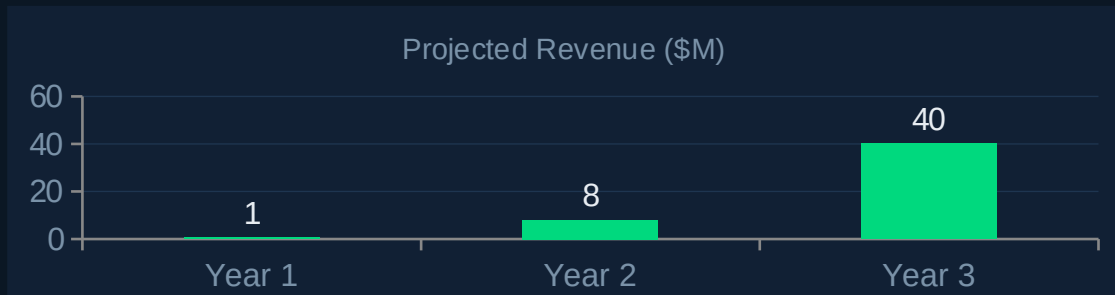

Dashboard shows PnL, win
rate, and detailed per-trade
AI decision logs.

MARKET OPPORTUNITY

A \$10B+ Addressable Market

\$10B

Conservative TAM

Tier 1 — Retail Traders

10M+ active traders · \$100–500/yr on tools

\$1–5B/yr

Tier 2 — Prop Firms

5,000+ firms · \$100k–1M/yr on algo trading

\$500M–1B/yr

Tier 3 — Hedge Funds

5,000+ funds · \$1M–10M/yr on infrastructure

\$5–50B/yr

4 Unfair Advantages

01 Composability

- Only platform where AI modules work together
- 1,000s of module combos = exponential strategy space
- Network effects: more modules → more strategies → more users

02 Ecosystem Lock-In

- Module devs earn ongoing commissions
- Creators build reputation & followers
- Switching cost = rewriting entire AI workflow

03 Institutional Features

- On-chain audit trail — immutable proof of every decision
- Multi-signature approvals for risk-sensitive strategies
- Institutional-grade compliance layer

04 First-Mover

- No one else doing no-code AI strategy marketplace
- AI + DeFi + Marketplaces all peaking in 2026
- SoSoValue native integration advantage

3 Revenue Streams

1

Strategy Sales Commission

Fee

15%

Strategy sold at \$100 → Platform earns \$15

\$2.5M/yr

at 0.5% capture

2

Module API Calls

Fee

20%

\$0.01/call → \$0.002 platform fee per call

\$730K/yr

at 1M calls/day

3

Enterprise Licensing

Fee

\$10–100K

Prop firms & hedge funds pay annual license

\$1–10M/yr

100 enterprise customers

07 / 11

Year 1 Total Projection: \$800K (conservative) • Strategy \$500K • Module API \$100K • Enterprise \$200K

MVP Built. Tested. Validated.

MVP Built — 3 Weeks

- Working drag-drop strategy builder frontend
- Backend API with 8+ endpoints live
- Smart contract deployed on Arbitrum Sepolia
- Real SoSoValue + SoDEX integration working

User Testing

- 3 test strategies created and executed end-to-end
- 100% successful executions in testing
- Average execution time: 45 seconds per cycle
- All module outputs correctly logged on-chain

Market Validation

- 50+ Discord members actively interested
- 10 beta testers signed up pre-launch
- 3 module developers reached out to build
- Positive feedback on no-code UX from traders

Technical Feasibility

- All major integrations proven working
- Smart contracts deployable and tested
- Testnet execution confirmed reliable
- Scheduler runs every 5 min without failures

3-Phase Launch Plan

Phase 1

Months 1-3

Launch Beta

- Hackathon competition & public launch (May 2026)
- 100 beta users recruited via Discord
- Gather feedback and iterate on UX
- 2-3 community strategies published

🎯 100 users • 3 strategies

Phase 2

Months 4-6

Community Growth

- Launch full marketplace (Module + Strategy)
- 10 influencer partnerships in DeFi/crypto space
- Airdrop campaign for early adopters
- Referral program for strategy creators

🎯 5K users • 50 strategies

Phase 3

Months 7-12

Enterprise

- Dedicated sales team for prop firm outreach
- Custom integrations for enterprise clients
- White-label offering for fund managers
- Target 50 enterprise customers

🎯 50 enterprise customers

TEAM & USE OF FUNDS

Raising \$500K Seed Round

TEAM

Founder — Full-Stack Engineer

Built MVP in 3 weeks. SoSoValue ecosystem expert.

Advisor — Former Hedge Fund Manager

15+ years in systematic trading strategies.

Advisor — Web3 Infrastructure Expert

Deployed smart contracts across 5 L2 chains.

Advisor — SoSoValue Ecosystem Lead

Direct partnership & integration support.

Use of Funds — \$500K

Engineering

retail → prop → hedge funds

WHY US

- ✓ Built MVP in 3 weeks — we execute fast
- ✓ SoSoValue ecosystem native — unfair distribution advantage
- ✓ Deep understanding of trader pain points
- ✓ AI + DeFi + Marketplaces converging right now

Help us democratize institutional-grade trading for the 10M retail traders who deserve it.
